

# Image Slider Web Project

**Submitted by:** Monica Lincy

**Web Development Course** – April 2025

A clean and responsive image slider web app made with HTML, CSS, and JavaScript, allowing users to view and navigate image content smoothly.

---

## ✨ Features

- 🔄 Auto-slide every 5 seconds
- ⬅️ ➡️ Next and Previous buttons
- 🖼️ Clickable thumbnails to jump to any image
- ⭐ Smooth fade animations
- 📱 Fully responsive on all screen sizes

---

## 🔧 Technologies Used

- HTML – Structure of the page
- CSS – Styling and layout
- JavaScript – Interactivity and slider logic

---

## 📁 File Overview

- `index.html` – Page layout and content
- `style.css` – UI design and transitions
- `app.js` – Slider logic and functionality
- `*.avif` – Image files used in the slider

---

## 🚀 How to Use

1. Open [index.html](#) in your browser
  2. Watch the slider run automatically or use the arrows
  3. Click thumbnails to view specific slides
  4. Enjoy the smooth visual experience!
